RESEARCH PROJECT

Deep Learning Approach for Solar Generation Forecasting and Identification of Operational Risk Periods for Grid Stability in Sri Lanka | Expected Aug 2026

- Developing a **deep learning**-based forecasting approach to predict hourly solar power generation and electricity demand.
- Identifying operational risk periods to support proactive grid management.
- Evaluating model performance using standard error metrics and visualizing forecasts with key operational insights.

PROJECTS

Handmade Jewelry Platform - Wave Mirissa | May 2025

- Tech Stack: **React, Tailwind CSS, Spring Boot, PostgreSQL**
- Built a full-stack e-commerce platform for a real client with **personalized jewelry features**, including a **questionnaire-based necklace recommendation system**, **face and neck landmark detection**, and a **Virtual Try-On feature**.
- Led the **testing and evaluation** phase by designing and executing **60+ structured test cases** across core modules covering **functional flows, UI/UX checks, negative testing**, and **user acceptance testing** to validate system reliability and ensure all major project objectives were met prior to deployment.

A Donation System - Life-Line | Oct 2024

- Tech Stack: **HTML, CSS, JavaScript, Bootstrap, PHP (OOP), MySQL**
- Developed a medical donation platform featuring **secure authentication, beneficiary case submissions, volunteer verification, prioritized case handling and integrated donations**.

Movie Review Application | Ongoing

- Tech Stack: **MongoDB, Java, Spring Boot, React, Tailwind CSS**
- Developing a full-stack movie review platform with a clean separation between frontend and backend, enabling scalable architecture.

VOLUNTEERING

"Pillam" Project | Rotaract Club of Uva Wellassa University | Nov 2023

Engaged in a community outreach initiative delivering learning sessions and essential school supplies to students in a rural area, improving access to educational support.
